

Milestone #7: Final Submission

All information as of 4:27 PM on May 9, 2017.

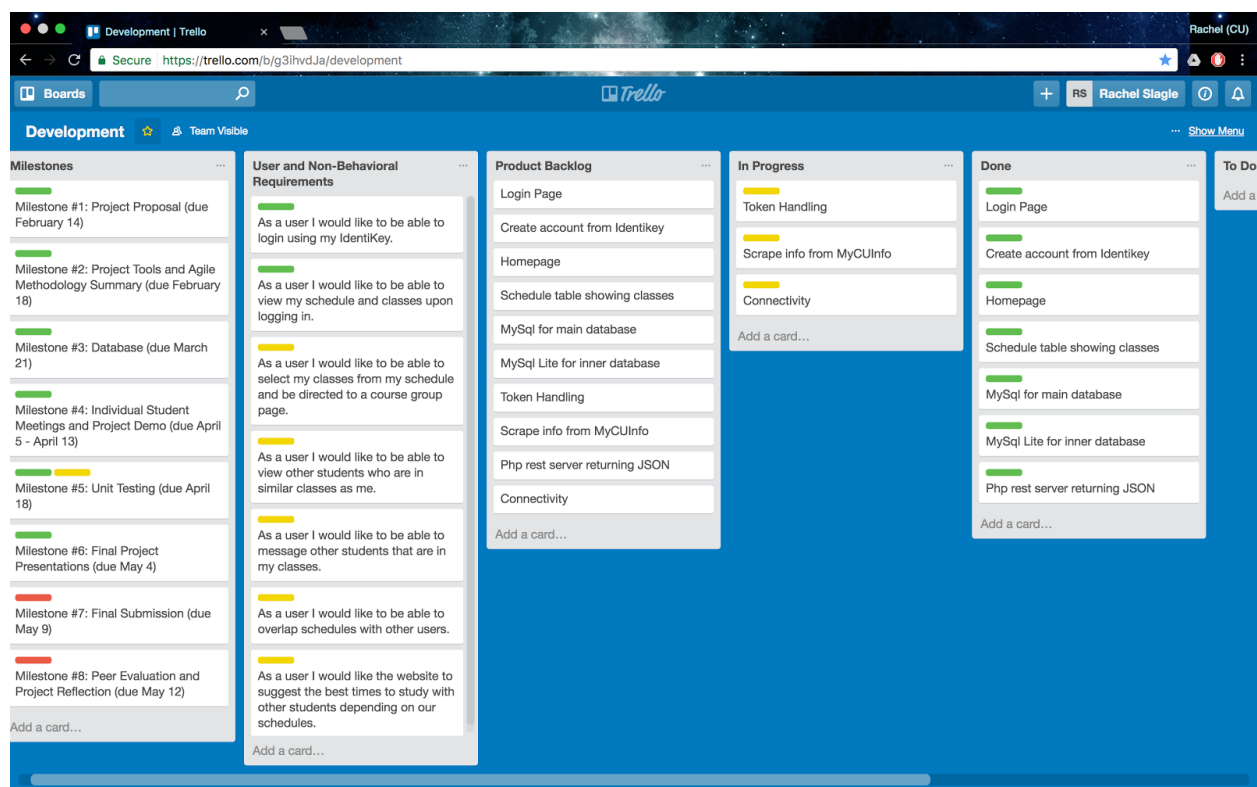

❖ **Project Title:** StudyIn

❖ **Who:** Lucas Schaack, Phillip Arsenian, Jimmy Young, Rachel Slagle, Jinxin Liu

❖ **Project Tracker:** Trello

➤ **Link to Project Tracker:** <https://trello.com/b/g3ihvdJa/development>

➤ **Screenshot of Project Tracker:**

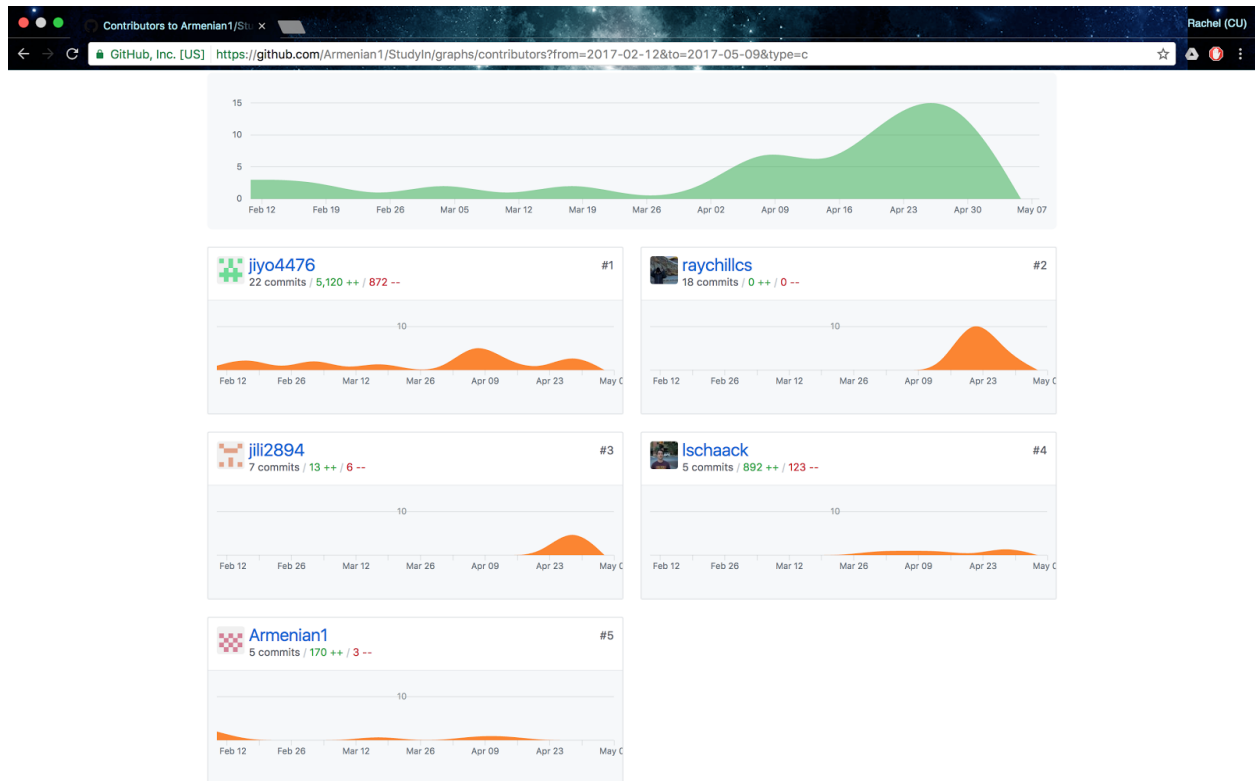

❖ **(Optional) Video:** None

❖ **VCS Link:** <https://github.com/Armenian1/StudyIn>

➤ **Description:** On our GitHub, all of the Milestones and the README.md are on the main directory. The website HTML, CSS, JSON, and PHP codes, including the source code used throughout the semester and the test cases, can be found in the "Website" and "Website_edited" folders. The database, as well as our initial start on a StudyIn application, can be found in their designated "Database" and "StudyIn_App_Netbeans" directories respectively.

- ❖ **Deployment (Description):** After pulling all files from the GitHub to your remote repository, you need to deploy the server for the website. In the “Websites” directory, there is a “.sh” file; run that on the terminal using the “./” command, which starts the running of the server. After that, you can run the website by typing “<http://localhost:8000/start.php>” into any internet browser.

- ❖ **(Optional) Auto-doc:** None
